

Safer Young People Community Meetings

Pre-meeting Mapping Table (Example)

In preparation for the meeting, we recommend completing the mapping table below. This helps to ensure that all relevant information is collated in one central place and enables you to identify the key concerns, individuals and questions that emerge to bring to the meeting.

It may also be helpful for you to physically map out the concerns in a spider diagram to identify links and networks (please ask for further guidance on this if needed).

Please ensure that all information and concerns that are brought to the meeting are relevant, evidenced, and current.
